

Your experts for high-performance chemical and mineral specialties. Since 1894.

Ceramic Microspheres

for epoxy formulations with
improved flow and abrasion
resistance

Your experts for high-performance chemical and mineral specialties. Since 1894.

Lehmann&Voss&Co.
LEHVOSS Group

Excellence in Detail.

Your experts for high-performance chemical and mineral specialties. Since 1894.

4th generation
family-owned business

Lehmann&Voss&Co. KG
LEHVOSS Group (HQ)

- Founded in 1894 by Alfred Lehmann and Helmuth Voss in Hamburg
- Own production since 1903
- Application technology laboratory since 1907
- Diverse and specialized sales and marketing organization
- Leading expert for chemical and mineral specialties

Your experts for high-performance chemical and mineral specialties. Since 1894.

Lehmann&Voss&Co. KG
LEHVOSS Group (HQ)
Hamburg (Germany)

Subsidiaries and shareholdings

- LEHVOSS France
- LEHVOSS UK
- LEHVOSS Italia
- LEHVOSS Schweiz
- LEHVOSS Nederland
- Engredo, Dänemark
- LEHVOSS Iberia
- LEHVOSS Polska
- LEHVOSS North America
- LEHVOSS Shanghai
- LEHVOSS Korea

Network

- Global sales network of distribution partners and agents
- Worldwide sourcing by own procurement organization
- Worldwide logistics hubs

Your experts for high-performance chemical and mineral specialties. Since 1894.

Business areas and product ranges

Plastics and Rubber

High-performance compounds

Technical compounds

Masterbatches and additives

Composite materials

Raw materials for rubber

Special Chemicals and Industrial Minerals

Magnesium compounds

Rare earth / zirconium compounds

Raw materials for paints and coatings, inks, construction chemicals, adhesives and sealants

Additives for metal working fluids, lubricants and functional fluids

Products for filtration and separation

Life Sciences

Raw materials for personal care

Nutrition minerals

Nutraceuticals

Pharmaceutical raw materials

Products for filtration and separation

Your experts for high-performance chemical and mineral specialties. Since 1894.

Ceramic Microspheres

for epoxy formulations with
improved flow and abrasion
resistance

Ceramic Microspheres

Chemistry

Description

Solid aluminum silicate microspheres

Properties

- Chemically inert
- Slightly alkaline
- Non-conductive
- Hydraulically active in high pH environments

Typical chemical composition

• SiO ₂	65.2
• Al ₂ O ₃	18.7
• CaO	6.4
• K ₂ O	2.2
• Fe ₂ O ₃	2.9
• TiO ₂	1.2
• P ₄ O ₁₀	1.2
• Others	< 1

Ceramic Microspheres

Physics

Shape

Almost perfectly spherical

Characteristics

Solid sphere

Melting temperature

approx. 1,000 °C (1,832 °F)

Loss on Ignition

approx. 3 %

Crush strength

> 65,000 psi

Grade	Density g/cm ³	d ₅₀ μm	d ₉₀ μm
XS	2.51	3.5	9.5
S	2.48	4.5	11.5
M	2.40	9.0	30.0
L	2.39	12.5	75.0
XL	2.25	50.0	200.0

Ceramic Microspheres

Physical properties

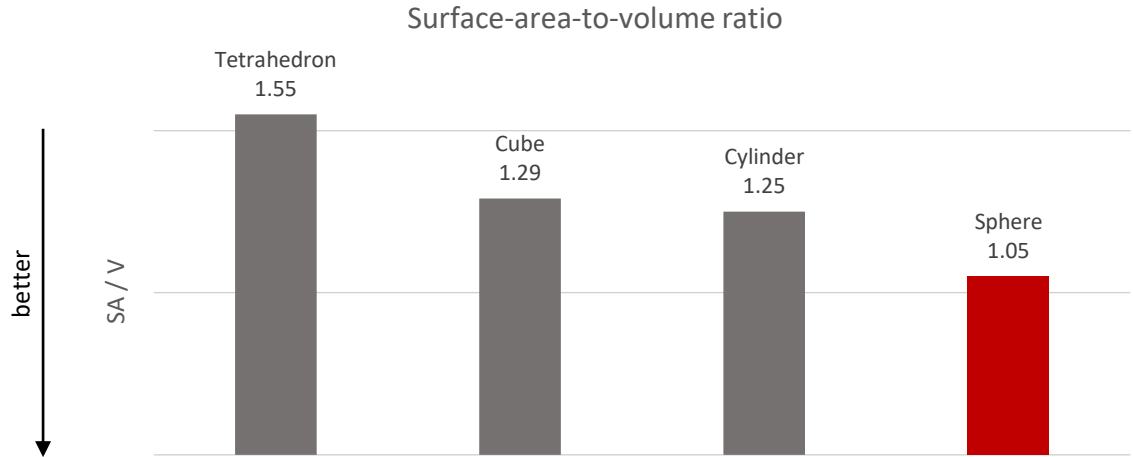

Typical particle size distribution Ceramic Microspheres M

Ceramic microspheres

Spherical shape

Spheres have the smallest surface area of all geometric shapes

Almost perfect spherical

Ceramic Microspheres

Test formulation

Solvent-free 2K Epoxy Floor Coating

		Reference	VP 23 08 1 / M
Base	A/F-Epoxy resin	45.0	45.0
	Slip and leveling additive	0.3	0.3
	Defoamer	0.4	0.4
	Antiflotation agent	0.6	0.6
	TiO ₂ (Rutile)	2.0	2.0
	Mica (30 µm)	15.2	15.2
	Crystalline Silica (125 µm)	11.5	-
	Barium Sulfate (3.5 µm)	25.0	-
	Ceramic Microspheres M	-	36.5
	<hr/>	<hr/>	
	100.0	100.0	
Curing agent	Cycloaliphatic amine	25.0	25.0
	Total	<hr/>	<hr/>
	125.0	125.0	

Reference formulation kindly provided by Westlake Epoxy Inc.

Ceramic Microspheres

Viscosity

Lower surface area results in lower viscosity

Ceramic Microspheres

Viscosity

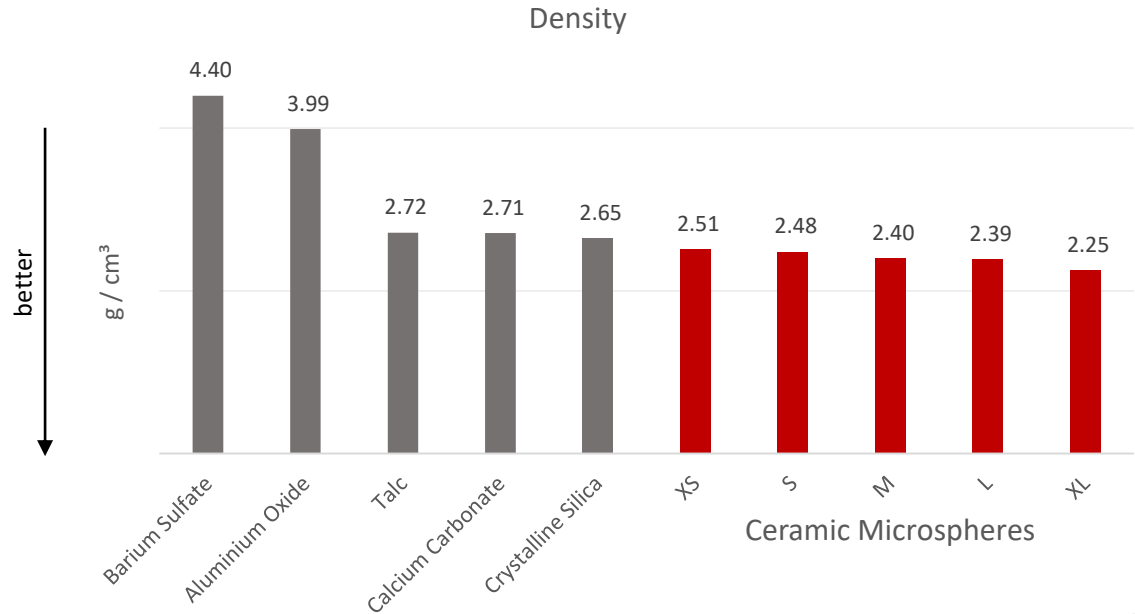

Lower surface area results in lower viscosity

- Lower viscosity due to lower surface area (spherical shape):
Enables either
 - reduction of binder and hardener
 - increasing filler content
(both result in cost reduction)
- Use in solvent-based products:
 - Reduction of the VOC content

Ceramic Microspheres

Density

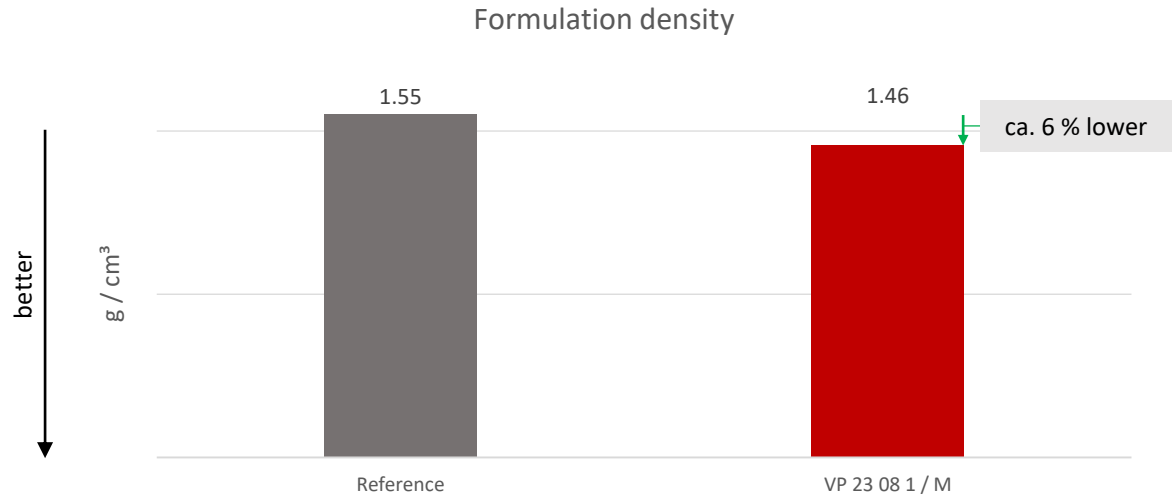

Density of ceramic microspheres compared to other fillers

Ceramic Microspheres

Density

Influence of lower density on formulation density

Ceramic Microspheres

Density

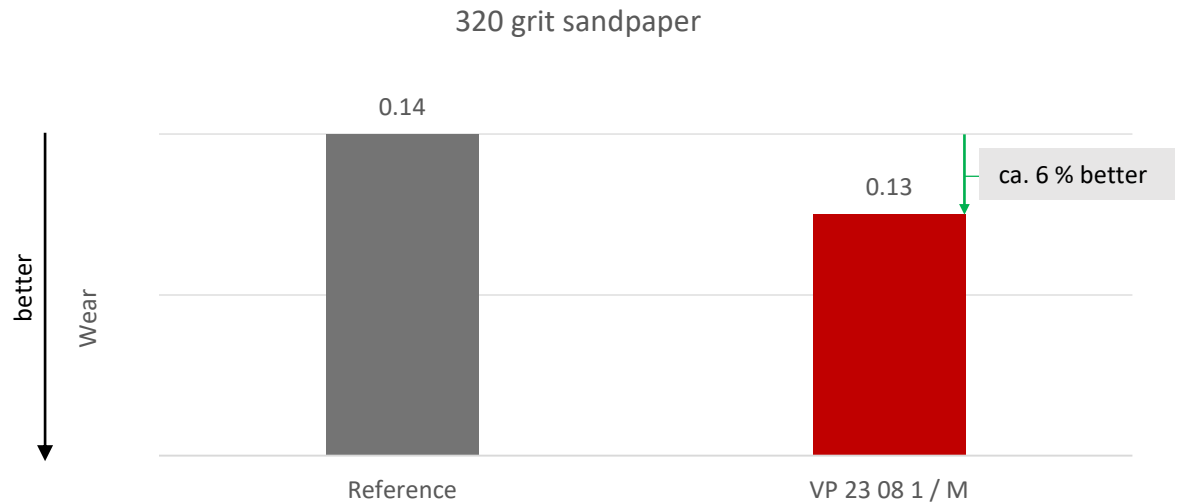

Influence of lower density on formulation density

- Lower formulation density due to lower density of ceramic spheres:
 - Weight reduction while maintaining same film thickness
 - Increase film thickness while maintaining same weight
 - Same volumetric filling of packages but lower weight

Ceramic Microspheres

Abrasion resistance

Influence on abrasion resistance

Ceramic Microspheres

Abrasion resistance

Influence on abrasion resistance

- Spherical shape and high crush strength of ceramic spheres enable:
 - Increased abrasion resistance
 - Longer service life of coatings
 - Avoidance of Crystalline Silica

Ceramic Microspheres

Disadvantage

Color not suitable for bright shades

Reference

VP 23 08 1 / M

Ceramic Microspheres

Disadvantage

Color not suitable for bright shades

- Brownish-grey color:
 - Bright colors such as white, sun yellow, fire red, ... are not possible
 - Not suitable for transparent systems
- Substantial opacity
 - Advantage for brownish-grey shades, pigment content can be reduced to achieve required opacity
 - Better in-depth protection against UV radiation

Ceramic Microspheres

Economic efficiency

Ceramic Microspheres must be expensive?

No, they are not expensive!

In addition to the performance and economic advantages they offer,
Ceramic Microspheres are not expensive.

I ask for your understanding for not quoting any figures here. 😊

Ceramic microspheres

Environmental aspects

Ceramic Microspheres of this nature
can be considered as 100% upcycled

- No mining
- Minimum energy for production
- Processing involves only
 - Air classification
 - Quality control
 - Packing
 - Shipping

Ceramic microspheres

Advantages

- Lower surface area
 - Results in lower viscosity
 - Enables reduction of resin and hardener
 - Enables higher filler content
 - Enables VOC reduction
- Lower density
 - Increased volume
 - Less weight with the same volume
 - More volume for the same weight
- Increased abrasion resistance
 - Longer service life
 - Avoidance of Crystalline Silica
- Excellent price-performance ratio
- 100% upcycled

Your experts for high-performance chemical and mineral specialties. Since 1894.

Thank you for your attention!
